Services offered by the consortium

- [Principal](#)
- [Offered services](#)

Our array of services has been designed according to the most advanced methodologies for project development

Architecture

The accumulated experience of our team of architects goes back to 1988 and includes projects of every kind, executed in the most diverse conditions.

Our services in this field range all the way from design and planning to the inspection and construction of projects. Being involved in all aspects of the execution of a project enables us to apply preventive measures to minimize costs and enhance quality.

The Consortium also has extensive experience in the production of construction plans and documents in international formats, facilitating their export in the search for financing, interdisciplinary support, and even execution.

Land Surveying

This department boasts a seasoned group of professionals, as well as fully electronic equipment (total station). We offer:

1. Topographic measurement of lots.
2. Elevation contour lines.
3. Cadastre-registered plans (planos catastrados) of lots, farms, urbanizations and condominiums.
4. Computerized drawings.
